OBJECTIVE

An aspiring Frontend Developer with hands-on experience building scalable, responsive, and user-centric web applications using React.js and Next.js. I enjoy translating complex requirements into clear, intuitive interfaces while maintaining a strong focus on usability and performance. Skilled in state management, offline-first applications, API integration, and client collaboration. Experienced in working on live production systems and delivering high-quality UI solutions.

EDUCATION

Bachelors of Computer Science and Information Technology

NED University of Engineering and Technology

2020 – 2024

Karachi

Graduated on 31st July 2024

SKILLS

Frontend Frameworks: ReactJS, NextJS, JavaScript (ES6+), TypeScript

UI Libraries & Styling: Material UI, Ant Design, Tailwind CSS, Bootstrap, HTML5, CSS3

State Management: Context API, Redux Toolkit

API & Integration: RESTful APIs, SMTP Configuration, Stripe Connect, Twilio Softphone Integration, Google OAuth

Databases: MongoDB, MySQL

Cloud & Storage: AWS, IndexedDB

Tools & Workflow: Git Version Control

Document & Reporting: Custom PDF Generation

PROFESSIONAL EXPERIENCE

Junior Frontend Developer

Quanrio LLP (Onsite)

11/2024 – present

Karachi, Pakistan

- Worked on live projects from the scratch, contributing to design, development, and feature implementation using React.js.
- Built frontend features for a parenting website, including a customized rich text editor for publishing articles, images, and parenting content involving nested and complex state management using Redux Toolkit.
- Implemented IndexedDB in the application to enable offline access and data persistence.
- Integrated payment gateway functionality for secure transactions.
- Coordinate directly with clients to discuss requirements, streamline workflows, and implement new features.

Frontend Developer Intern (React JS)

Transviti Pvt. Ltd. (Onsite)

10/2024 – 11/2024

Karachi, Pakistan

- Designed and enhanced frontend components of TalentVare (a hiring platform designed to streamline the recruitment process) using React.js and Material UI.
- Collaborated with backend developers to integrate APIs using the Fetch API and manage application data.
- Implemented Redux for state management to handle complex application states efficiently.
- Debugged and resolved frontend issues to improve performance and user experience.

KEY PROJECTS

NSPG (National Standard Price Guide)

- Worked on NSPG (National Standard Price Guide), a large-scale platform helping service businesses calculate breakeven costs, set profitable pricing, and simplify sales using flat-rate pricing.

- Developed and enhanced the **Numbers Cruncher** module to calculate cost of doing business, breakeven points, employee costs, and profit margins using a simple, user-friendly input system.
- Contributed to the **Price Guide Manager** module by managing both Admin and Tenant Portals, including Excel-based data imports, profit price calculations, data copying/exporting, and PDF generation for custom price books.
- Built features for the **NSPG Price Guide Web App**, an electronic flat-rate price book used by field technicians across devices (desktop, tablet, mobile).
- Implemented offline-first functionality using IndexedDB, including reload and re-sync mechanisms to keep data updated between the **Price App** and **Price Guide**.
- Enabled technicians to generate option sheets, invoices Pdfs and send them directly to customers via integrated email configuration.
- Collaborated closely with backend developers and directly with clients to ensure smooth data synchronization, accurate pricing logic, and scalable system architecture.
- Worked on the **NSPG CRM** module, developing admin and tenant panels for subscription management to buy the specific product bundle, appointment management, payment history, lead management, and tenant-to-customer conversion etc.

Begin With Children (BWC)

- Developed an admin portal for the BWC (Begin With Children) parenting website, serving as a CMS to publish and manage parenting-related content
- Designed responsive and user-friendly UI using Ant Design and Tailwind CSS.
- Implemented Redux Toolkit for efficient and scalable state management across the application.
- Built a nested routing structure to support main categories and multi-level subcategories.
- Used dynamic route parameters to manage category IDs and correctly associate content across nested levels.
- Collaborated closely with the Backend developer to design the data structure and ensure proper storage of hierarchical category data on the server.

Scholarship Portal

- Took part in Web Development Competition at University and developed a MERN stack Scholarship Management Portal enabling students to apply for scholarships through a centralized platform.
- Designed a role-based system with separate access and features for students, admins, and supporters.
- Built a personalized student dashboard featuring customizable color themes and dark mode, allowing students to manage profiles and academic details.
- Enabled students to search and apply for scholarships based on eligibility criteria such as CGPA.
- Created an Admin Panel to approve student registrations, review applications, grant scholarships, and manage supporter registrations.
